

# School Subjects

A vocabulary presentation

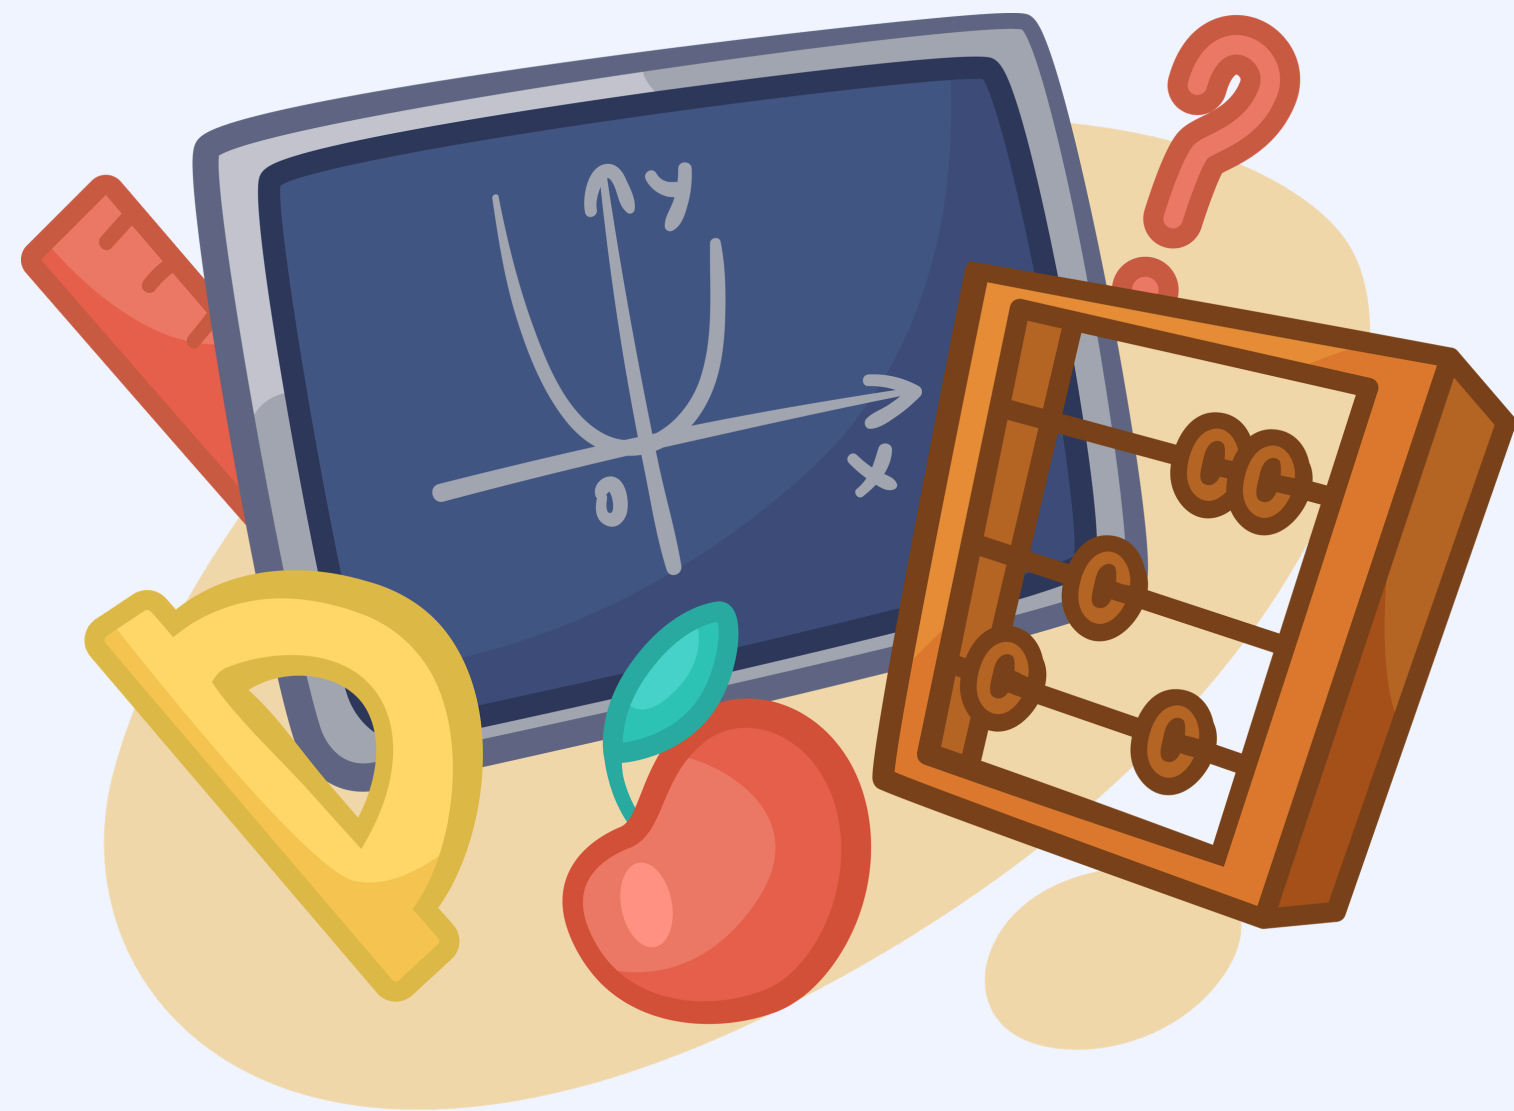

# Introduction

Welcome everyone! In this presentation, we're going to learn about different school subjects, like math, science, and history. Knowing these words will help you talk about your classes and share what you enjoy learning. Let's dive in and explore the vocabulary of school subjects together!

# Math

"I enjoy solving  
problems in math class."

# Science

"We study plants and animals in science."

# Literature

"I enjoy reading interesting stories and discussing characters in literature class."

# History

"In history, we discover important people from the past."

# Music

"We love singing songs and learning about instruments in music class."

# Physical Education (P.E)

"We play sports and exercise during PE class."

# Computer Science

"I enjoy learning to code and creating programs in computer science class."

# English

"I like reading stories and learning new words in English class."

A decorative border on the left and right sides of the page features various science-related icons. On the left, there is a yellow lightbulb, a blue atom model, a green microscope, a blue computer monitor, and a yellow book. On the right, there is a blue atom model, a red book, a blue microscope, a blue computer monitor, and a yellow book. The background is white with horizontal grey lines.

Great Job!
